

Araybeam Corporation Earns Prestigious NABCEP Company Accreditation

First Solar Company in Maryland to Earn NABCEP Company Accreditation

Indian Head, MD — Araybeam Corporation has just received Company Accreditation by the North American Board of Certified Energy Practitioners (NABCEP). NABCEP awards accreditation to companies that meet a rigorous set of standards around installation, employee training and qualification, safe work practices, and customer accountability. Araybeam Corporation joins ten other NABCEP Accredited Companies around the country that have distinguished themselves by adhering to a set of industry-recognized best practices.

To earn a NABCEP Company Accreditation, Araybeam had to undergo a thorough and rigorous application and review process that included the submission of procedures and policies and independent, third-party inspections of previously installed systems. The core elements of NABCEP Company Accreditation include: employment of NABCEP certified installation and technical sales personnel, documented and consistent policies and programs as they relate to the operations of the company, ongoing worker training program(s), and a strong focus on worker safety.

Quote from John Holt

“Earning the NABCEP Company Accreditation is a major accomplishment. To achieve this accreditation, Araybeam Corporation had to demonstrate a company-wide commitment to quality assurance throughout the sales, installation, and after-sale process,” said Shawn O’Brien, Executive Director of NABCEP. “The staff at Araybeam Corporation were a pleasure to work with, and we were particularly impressed with their deep commitment to training and development in Puerto Rico. From everyone at NABCEP, congratulations!”

About NABCEP

The North American Board of Certified Energy Practitioners (NABCEP) is the most respected, well-established and widely recognized national certification organization for professionals in the field of renewable energy. NABCEP offers entry-level knowledge assessment, professional certification, and company accreditation programs to renewable energy professionals throughout North America. NABCEP’s mission is to develop and implement quality credentialing and certification programs for practitioners by supporting and working closely with professionals and stakeholders in the renewable energy and energy efficiency industries.
